

Lumitron COVID-19 Statement

March 23, 2020

Dear Customers, Partners, Suppliers, and Friends:

Many of our lighting products are built for the U.S. military, law enforcement, medical evacuation, and search and rescue missions. Many of our customers are considered prime contractors and are working on Federal U.S. Government Department of Defense contracts. Many of these contracts fall under the Defense Priority Allocation System (DPAS). The purpose of DPAS is to assure the timely availability of industrial resources to meet current national defense and emergency preparedness program requirements. These contracts typically have a DO-A1 Defense Priority rating.

Lumitron Aerospace Lighting Components is therefore a critical supplier to United States Government Department of Defense; this means that our operations and personnel fall under the definition of *Essential Business*: Military and Defense contractors and their essential personnel are exempt from the various state and local stay-at-home orders. Essential personnel include prime, sub-prime, and supplier contractors' employees at both the prime contract level and any supplier level at any tier.

Our production facility continues to operate during normal business hours Monday to Friday and will remain fully operational for the foreseeable future. We will continue to follow CDC guidelines to ensure that we maintain a safe work environment for our employees.

We greatly appreciate the extra effort put in by our customers, our suppliers, and our employees for continuing to perform the work that has been deemed essential for national security. We wish you a safe, healthy, and swift outcome to this global pandemic.

Please don't hesitate to contact us with any questions or concerns.

Sincerely,

Gil Chassie

Gil Chassie, President
